

SolarInnovate Energy Solutions

Copenhagen lithium energy storage power customization company

Overview

Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 - European Energy has started on its first large-scale battery storage project.

Why is battery storage important in Denmark?

Denmark has emerged as a significant player in battery storage technology, playing a vital role in the global transition to renewable energy. As demand for electric vehicles and clean energy solutions grows, the importance of battery storage in the Danish market continues to rise.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

How will a battery help balance the power grid in Denmark?

In addition, the battery will offer crucial system services to help balance the power grid in eastern Denmark. It will store surplus renewable energy during periods of high production and supply it back to the grid when demand is high, improving overall energy efficiency.

Why should European Energy Invest in battery storage?

With the installation of a state-of-the-art battery, European Energy is positioned to enhance the stability and resilience of the electricity grid. "Battery storage is a key component in the development of future energy projects.

Why is Kragerup partnering with European energy?

This collaboration with Kragerup Estate will provide us with hands-on experience in battery storage and further the development of integrated energy systems, not only in Denmark but also in other markets where we operate,” said Mads Lykke Andersen, Director and Head of Technology Development at European Energy.
