## Overview

---

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Why are solar panels so popular in Georgia?

Solar panels have become increasingly popular in the state of Georgia. In recent years, solar energy installation has risen steadily in response to its multiple benefits for both residential homes and commercial businesses. Solar panels provide an alternative energy source, reducing dependence on natural gas and electricity.

Who are the best solar installers in Georgia?

According to solar shoppers on the EnergySage Marketplace, the top five solar installers in Georgia are IntegrateSun, LLC, NuWatt Energy, Custom Solar Solutions, Astrawatt Solar Atlanta, and Southern Solar Pro How many solar companies are in Georgia?

Should you choose a local or national solar installer?

.

Are solar panels a good investment in Georgia?

Contact us now to start saving money on your power needs with a system more reliable than your electric utility can provide. Solar panels have become increasingly popular in the state of Georgia. In recent years, solar energy installation has risen steadily in response to its multiple benefits for both residential homes and commercial businesses.

## Should you go solar in Georgia?

For those looking for an efficient and cost-effective way to reduce their carbon footprints, going solar in Georgia is a great choice. From the moment you contact Alternative Energy Southeast, Inc., we will be a one-stop shop for your solar panel installation and energy storage needs from start to spectacular finish.

## How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.
